

System-Wide

NEW: Saved Searches

Administrators can now define searches by user or all users belonging to a permission group. These searches will be saved again the user's login so they will be available from any device.

CHANGE: Color scheme

The color scheme of the app has been updated to include a white background.

CHANGE: Home Screen (Android)

The List option has been removed from the Android home screen. To access your most recently run search, go to **Work Search** and select the *Active Search*.

CHANGE: Readings Time

The time at which a reading is taken will now be recorded for each reading.

FIX: "Today" Relative Search (iOS)

The search for records based on "today's" date will now return the correct results at any time of day.

Inspections

NEW: Readings History

When viewing work readings in Inspection mode, the app displays a history of the last 5 values recorded for each reading. Values will be displayed in chart format for numerical readings; all others will be displayed in a table. Device must be online for history to be available.

CHANGE: Readings List

From each reading, the following options are accessible: Edit, Instructions, Notes, and History.

Work

CHANGE: Emailing Work

When a work record is emailed, the email will now include task instructions as well as any files (images or PDF's) attached.

CHANGE: Image Compression (iOS)

Images attached to Work will be compressed for printing and emailing from the desktop application.

CHANGE: Readings Time

The time at which a reading is taken will now be recorded for each reading.

CHANGE: Work Tabs

The *Equipment* and *Files* tab will now be visible on work records in detail view on tablet devices.
