

Work

NEW: Advanced Search

This new option, found within the Work List, will allow you to search on additional Work-related criteria. Note the search run from the Advanced Search window is separate from the search fields available within the List view; running either search will update the list results accordingly.

NEW: Print List

This new option, found within the Work List, will print the records currently displayed in your Work List.

CHANGE: Entered Date Search

You can now search on the following ranges within the Work List: Next 90 Days, Next 365 Days.

CHANGE: Floor field constraints

For those clients configured to constrain their Unit list by Floor, the Floor list will now be constrained by the Property selected. Choosing a new Property value will clear out the Floor field, just as choosing a new Floor value will clear out the Unit field.

FIX: Floor length check

For those clients using a freeform Floor field, the system will now check for values not exceeding 20 characters when Work is submitted.

FIX: Work Custom Field data types

Custom Fields of data type "Text" will now be displayed a single-line text fields in all Work modes.
Custom Fields of data type "Multiline" will now be displayed a a multiline text field in all Work modes.

Visitors

CHANGE: Expected Date Search

You can now search on the following ranges within the Visitor List: Next 90 Days, Next 365 Days.

FIX: Visitor Custom Field data types

Custom Fields of data type "Text" will now be displayed a single-line text fields in all Visitor modes.
Custom Fields of data type "Multiline" will now be displayed a a multiline text field in all Visitor modes.

For more information on configuring any of the above features, please contact your Client Success Manager.
