System-Wide

NEW: Current date/time population
All date and time fields will have a "Now" button next to them. If selected, it will populate the current date/time in the respective field.

NEW: Filters on drop-down lists
For any fields represented as lists on Gateway, if there are more than 10 options in the list a filter will appear at the top of the list. You can enter any text in the filter to constrain the list values.

FIX: Custom Date Fields
Values entered in custom date fields will now be displayed in View and Edit mode.

FIX: Print List
The list which prints to the browser and sends to the printer when Print List option is selected has been optimized for up to 10 fields included in the view.

Visitors

NEW: Print List
A "Print List" option will now appear in the Visitor List (next to the "Reset" option). If selected, it will print a list of all records currently available in the list. The details are based on the fields visible in View mode.
