System-Wide

CHANGE: Inspection terminology
From the Inspection list, the mode selection options have changed. "Inspection" will now be referred to as "All" while "Barcode Inspection" will be referred to as "Filtered".

FIX: Locked Work will not be editable
Work that is set to a Locked Status Type will no longer be editable from within Mobile.

FIX: Posted Work will not be editable
Work that has been Posted will no longer be editable from within Mobile.

Work

FIX: Add Photo rotation
Photos added during Work entry will now retain their original orientation (portrait or landscape). Previously they were always set at landscape.

NEW: Material Summary Report
This report, accessible from the Work List menu, prints a summary of all Materials linked to the Work currently displayed in the list. Materials are sorted by Material Type, and for each material it lists the *Code* (if applicable), *Description*, and *Quantity*.

NEW: Materials tab
You can now access a **Materials** tab for each Work record in detail view. From here, you can add, edit, or delete materials.

For more details on this feature, please see our documentation on **Mobile – Android User Guide 7.0** and **Mobile – iOS User Guide 7.0**

FIX: Tasks without Instructions will no longer show this section
The **Instructions** section will no longer appear under the Work **Task** details if no instructions have been defined for the Task.
