

Material Projections Report

The Material Projections Report in the AwareManager JXT is designed to be as flexible as possible. This search-based report displays the materials required for completion of the Maintenance records, based upon search criteria and an entered date range.

To access this report from the Maintenance list, choose **Operations**→**Material Projections Report**. You can also access this list from the main Console by going to **Administration**→**Reports**, and navigating to the list of Maintenance reports.

Search window:

The screenshot shows a search window titled 'Material Projections Search'. It contains three search criteria sections:

- Range:** A dropdown menu set to 'Equipment' followed by a date range input field.
- Range:** A dropdown menu set to 'Next Date' followed by a date range input field.
- Range:** A label 'Range:' followed by a label 'Projection Date:' and a date range input field.

 At the bottom of the window are three buttons: 'Search', 'Cancel', and 'Clear'.

Enter any search criteria for the report you would like displayed. Then enter a *Projection Date* range, which allows the system to know how far ahead to report on the Materials needed.

Example of the Material Projections Report:

Material Type	Material Type Description	Quantity
CLEAN		
TEST KIT	Test Kit	8.00
HVAC		
BELT-6SDLL4	6SDLL4 Belt	60.00
FIL-24X20X2	24X20X2 Pleated Filter	18.00
TS TAT-550	Thermostat 550	12.00

The data for this report was accumulated from the following Maintenance records (the number of projected Work records are in parenthesis):
 AHU-01-A (1), AHU-01-Q (4), AHU-01-S (2), AHU-02-A (1), AHU-02-Q (4), AHU-02-S (2), AHU-03-A (1), AHU-03-Q (4), AHU-03-S (2), CT-1-Q (4), CT-2-Q (4), F-EX-1-M (12)

Records printed: 4
